**DAHLIAS FROM OUR GARDENS ARE OF
VERY GOOD QUALITY AND NOT EXPEN-
SIVE, THEREFORE BUY YOUR DAHLIAS
FROM A SPECIALIST!**

This catalogue includes a fine collection of commercial cutflower varieties in several sizes, as well as large flowering dahlias for the garden.

For over 30 years we have been supplying our customers with healthy, strong divisions; true to name. If, during all these years, you have ever received an order that was not true to name or one that you thought there should be an adjustment on, we will be glad to consider it at this time. Our aim has always been, and will continue to be, to please you.

Many reliable firms buy from us in large quantities, for they know they can trust our stock, then resell to their own trade.

On small orders parcel post is sometimes cheaper than express but your order will freeze in cold weather. If you are in no hurry for your bulbs, just tell us in your order to send as soon as weather permits. Be sure to include your postage and "special handling" can be had for a very small fee. Any extra postage will be returned promptly.

Thanking you for all orders and extending you a hearty welcome to visit us at any time, during flower season, bulb season or growing season.

REMEMBER, WE GROW ONLY DAHLIAS

Culture and Care of **DAHLIAS**

Plant dahlias in spring after the ground is warm and danger of frost is past. From May 10th to June 10th in the central states. Lay tubers flat and cover four to six inches deep. Plant two feet apart in the rows and rows three to four feet apart.

Don't plant close to trees or large shrubbery on account of the tree roots using all the moisture. It is not advisable to plant on the south or west side of a building on account of the sun reflecting too hot on the plants. Always plant where the ground is well drained. Dahlias will grow in any good soil from pure sand to stiff clay, if water and fertilizer are added when needed. They usually bloom nicely without any water or additional fertilizer in the average garden where it will grow good potatoes and vegetables, if cultivated properly.

Cultivate dahlias each week and water occasionally. When dahlias begin to bud and bloom, stop cultivating but keep the weeds out; give the plants a good liberal dressing of bone meal, cow manure, sheep manure, or any fertilizer that is not too strong or has a tendency to burn the plant, keeping manure six inches away from the plant, and water thoroughly once each week, or mulch over manure with straw or lawn clippings. Drive a strong stake about ten inches from plant and tie the plant to prevent it blowing over.

Early in the season insects eat on the buds and flowers. When flowers open only on one side this is because the bud was stung when smaller. Examine your buds and you can detect this by a small black speck on the side of the bud where it has healed over.

Where large blooms are wanted, take all but three of the largest buds off, leaving all the strength to the three buds and they will be of enormous size.

When frost kills the plants in the fall, lift tubers carefully and cut off the stalks; then pack carefully in boxes with dirt or wrap with paper and put in paper cartons. Store in basement where they will not freeze or dry out. Leave in storage until planting time the next spring.
